

# Stripper A

General purpose stripper and cleaner or protection and enhancement of concrete

## Description

**Stripper A** is a combination of aliphatic and aromatic solvents and non-ionic emulsifier. It is a clear liquid with characteristic solvent odour when it turns milky white when combined with water.

## Advantages

**Stripper A** is a general purpose cleaner which may be used for removal of a variety of oils, greases, hydrocarbon resins, natural and synthetic rubber from a variety of strata.

**Stripper A** effectively strips curing membranes from concrete floors.

## Application

Apply the product as supplied to the areas to be cleaned without any diluent. Scrub the product into the medium to be removed until it is dissolved and then add water to produce an emulsion which may then be vacuumed or wiped off.

## Precautions

There should be good ventilation of areas in which **Stripper A** is used and excessive inhalation of volatiles should be avoided. Use suitable face protection.

The product has a drying effect on skin and may cause allergic reaction if personnel working with the product are sensitive to solvents and exposure is prolonged. No open flames or sparks should be allowed in the vicinity. Avoid prolonged breathing of vapour and contact with skin. Keep out of reach of children.

## Packaging

**Stripper A** is supplied in 25 litre or 5 litre polycans.

## Shelf Life

**Stripper A** has a shelf life of up to twelve months, stored in cool dry conditions, protected from high temperatures ( $\pm 40^{\circ}\text{C}$ ) and kept closed and dry. Stir vigorously prior to application.
