Non-slip when wet with sealer

FloorCoat Mid Grey

Samples available for viewing. Colours depicted as a guide. Final sealer may enhance or darken colour.

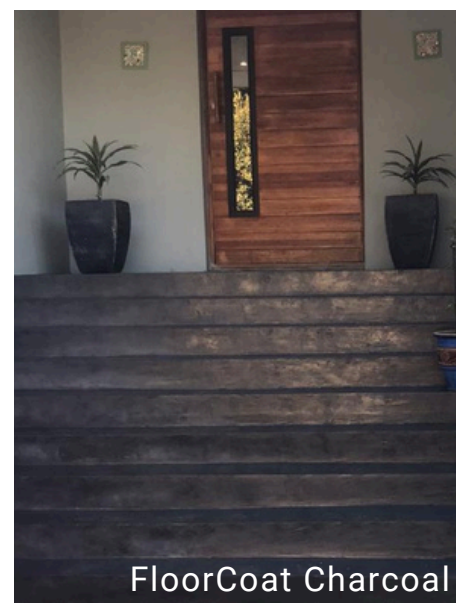

FloorCoat takes market by storm. Ease of use makes installation effortless.

Floor preparation is essential for successful installation. Our Technical team can advise on installation methods to achieve success. Products are designed with ease-of-use in mind, allowing the adamant DIY enthusiast to efficiently complete own installations.

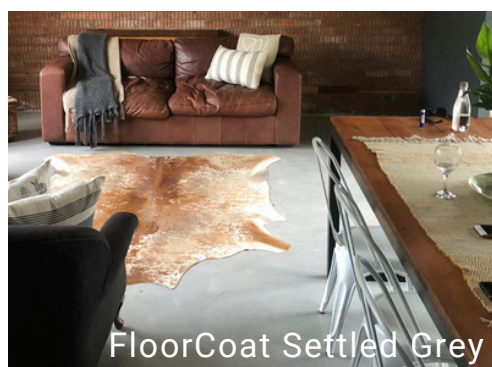

Concrete is extremely porous. Household items like vinegar, tomato sauce, red wine and cold drinks can degrade concrete over time.

Sealing your coloured concrete enhanced floors is vital to increase the lifespan of your floor.

Our MM Sealer is available in gloss (Buffable), sheen (Combo) or no sheen (Siloxane).

FloorSkim XL Blast Furnace Grey

Simply stylish. Interior or Exterior.

2mm to 3mm application that delivers beautiful results. Sealer enhances colour and renders the floor water repellent and stain resistant.

Ideal for levelling uneven concrete surfaces. Easy to install for renovations, Good resistance to mid-level traffic.

Great product to use for renovations. Concrete is a high thermal mass material. This means it absorbs and stores heat when exposed to sunlight and slowly releases heat throughout the day, making concrete floors a great option for keeping your home warmer in winter.

Great range of colours to choose from to suit any style.

For quality you deserve.

PACKAGING : 25kg bag

BENEFITS :

Residential, commercial and industrial projects

Abrasion-resistant

Durable, wearing surface due to enhanced strength

Light-reflective

May be sealed for colour enhancement and non-staining

Non-slip when wet with sealer

Chemical resistance to household chemicals

**Detailed Technical datasheets available on request or on our website*

MBFT P Settled Grey

MBFT P Blast Furnace Grey

MBFT P Cream

MBFT P dry-shake provides the durable, quality concrete floors you deserve supported by an international reputation for success.

Our MBFT P forms a monolithic bond with new concrete surfaces - it is part of the concrete substrate.

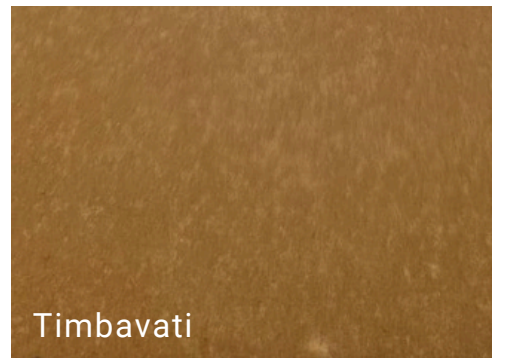

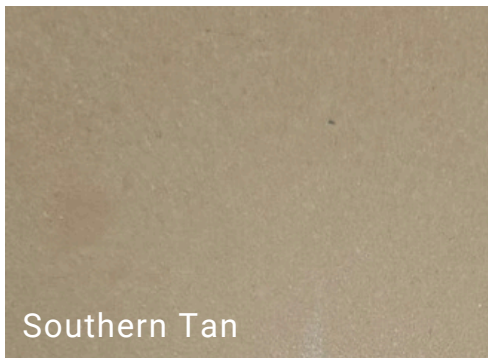

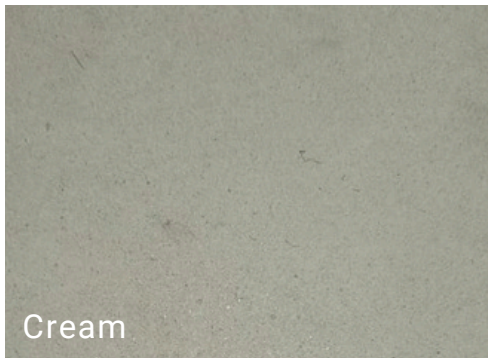

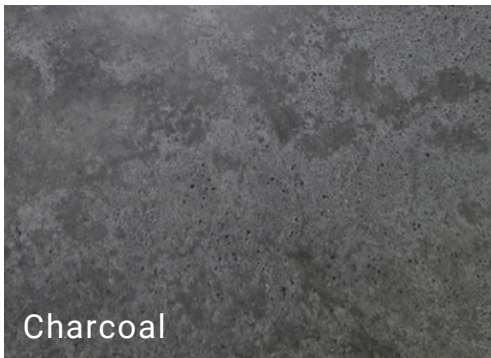

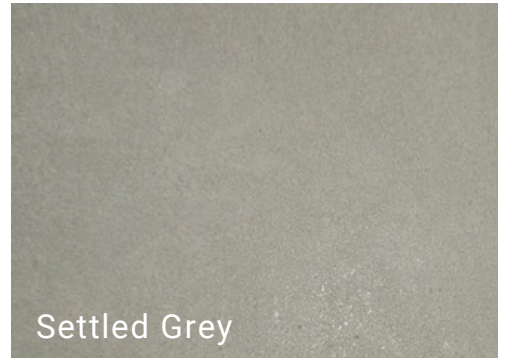

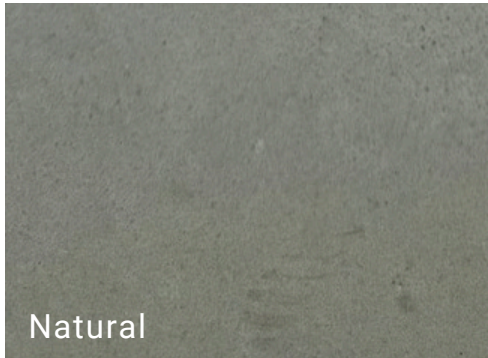

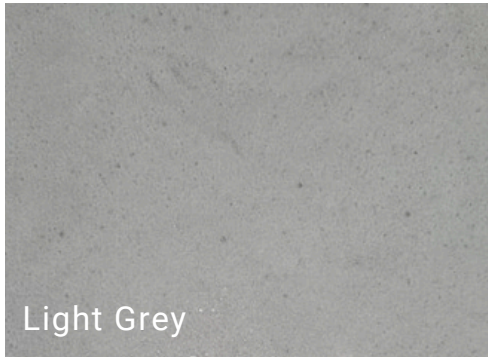

Giving you over 60MPa surface strength. Design strength of residential concrete is generally about 25MPa.

Excellent abrasion resistance on the trafficable surface. Light reflective colours ensure less energy sourced lighting.

MBFT P offers resistance to chemical attack. Household items like wine, sugary drinks, vinegar is degrading to concrete surfaces.

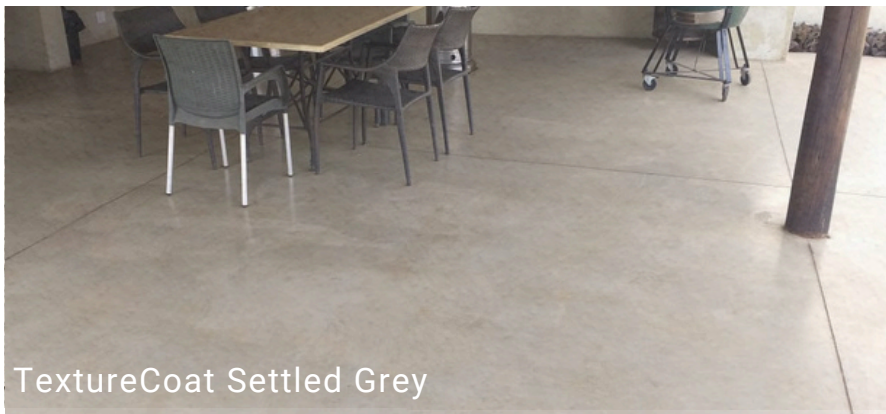

MBFT P Frittles

Samples available for viewing. Colours depicted as a guide. Final sealer may enhance or darken colour.
